SPRING CLUB INTERNATIONAL TRAUMA COURSE

26. INTERNATIONAL CADAVER

04 - 05 March 2024

Jena, Germany

HANDS-ON COURSE

In this course - you will learn and practice established and the new surgical techniques on human cadaveric specimens.

Welcome to Thuringia, Germany.

Although much learning occurs in the operating theater, enough time must be spent in the dissection laboratory to acquire sufficient anatomic knowledge and familiarity with surgical techniques before proceeding to live operations.

Cadaver work continues to be valuable even after earlier-level procedures have been mastered because it provides an enhanced understanding of anatomic relationships that cannot be adequately explored in the operative setting.

Inviting worldwide leaders in the field of Trauma and orthopedic surgery we aim to provide a hands-on cadaver workshop focusing on step-by-step demonstration and dissection.

Together with our staff, we are looking forward to providing you with an excellent learning opportunity and an enjoyable stay in our cities in Thuringia.
